

RAMADA ENCORE HOTEL

LOCATION: LONDON, UK
FINISH: SYNTHATEC PREMIUM
SIZE: 2000 M2

PROJECT DETAILS

The Ramada Encore Hotel is ideally located at Gypsy Corner on the A40, with 150 stylish ensuite bedrooms and 5 modern purpose built meeting rooms.

The bright red colour required for the exterior façade was specified in Synthatec Premium, as compared to standard polyesters, this product demonstrates no visual colour and gloss fading.

Synthatec Premium is increasingly being specified on landmark projects across the globe with architects and contractors looking to give their project extra protection from the elements, backed by a 40 year guarantee in the UK and Northern Europe.

LBL Finishers coated the entire project for CGL Systems, which equated to 2000m2 of aluminium rainscreen panels.
