

ZLOTE TARASY

LOCATION: WARSAW, POLAND
FINISH: DURANAR XL – CHAMPAGNE SILVER
SIZE: 30,000m²

PROJECT DETAILS

Zlote Tarasy is the first 'new generation' multi-purpose complex based in the centre of Warsaw and has an area of over 200,000m². It will contain offices, commercial areas and an entertainment and recreational park.

The park is protected by a 10,000m² free-form glazed roof, which encloses the terraced retail area and creates an ambience of an external shopping centre.

LBL Finishers were the exclusive PVDF applicator for this project and worked closely with three European fabrication companies to produce approximately 30,000m² of external panelling and extrusion, which is finished in a 3-coat champagne metallic.
